

MOONSHINE MEATS BEEF PRODUCER PROTOCOLS

It is our guarantee that all Moonshine Meats producers strictly adhere to the following:

1. All cattle are raised and finished in the southeastern United States.
2. All animals are identified with an ear tag, no later than weaning age.
3. There is complete transparency and traceability for each animal.
4. Producers must maintain basic data on the lifestyle and medical treatments of each animal. Veterinary treatments, such as vaccinations and worming, must be recorded on each animal's record. This information must be available for review at any time.
5. No wormer can be given within 30 days of slaughter.
6. Our producers agree to never give their cattle
 - antibiotics
 - hormones
 - artificial growth enhancers
 - grains or corn
 - animal by-products
 - food waste
 - electric prods
7. Once animals are weaned, their diet consists of grasses, legumes, hay, haylage and balage.
8. Animals must be raised outdoors on pasture year-round.
9. Producers will use only low-stress techniques in both daily handling as well as transportation and delivery.
10. Payment is based on the quality of the beef and the producer's ability to deliver based on the customized production and delivery schedule set prior to the cattle leaving your farm.

I have read and understand these protocols and realize that participation in this program will be terminated if all protocols are not followed.
